

Tour Description

Tour Bus loads at 8:00am and departs from the conference hotel at 8:15am

Metro Paint 4825 N Basin Ave, Portland, OR 97217

MetroPaint has remade millions of gallons of latex paint at their Swan Island facility, keeping these reusable resources out of landfills. Using recycled paint: • decreases your carbon footprint. • reduces the need for landfill space. • conserves the water needed to make new paint. • prevents pollution from the mining and extraction of raw materials.

Columbia Resource Center 11034 NE 117th Ave, Vancouver, WA 98662

Columbia Resource Company is a Waste Connections of Washington company in Clark County, Washington with three locations providing safe and environmentally sound recycling and waste disposal solutions for residents, industrial and construction industries. CRC Central is the main hub of the household hazardous waste program including lab packing, recycling, and disposal outlets.

Hopworks Urban Brewery aka The HUB Portland 2944 SE Powell Blvd, Portland, OR 97202

From reconstructed facilities to net zero energy efficiency, Hopworks Urban Brewery brewing and restaurant facilities are built to reduce environmental impact today and into tomorrow. Their sustainability practices include a water use initiative, supporting biking as a primary transportation means, a zero landfill goal, and energy efficiency practices.

Apex Laboratories 6700 SW Sandburg St, Tigard, OR 97223

A wide range of Organic and Inorganic regulatory analyses are available at Apex Laboratories, performed according to EPA, State, ASTM and Standard methods for a variety of matrices. Apex is also able to accommodate method development, bench studies and validation for special projects. Apex prides themselves on being flexible, independent, and versatile with a wide variety of services available.
