VIRTUAL 2020 TRAININGS

NAHMMMA'S 35TH ANNUAL
HAZARDOUS MATERIALS MANAGEMENT CONFERENCE
WEEK OF SEPT 21

NOW MORE THAN EVER, YOU NEED NAHMMMA'S TAILORED AND TECHNICAL HHW MATERIALS MANAGEMENT CONTENT

The 2020 Virtual NAHMMMA conference includes 2 days of live and recorded sessions, and 3 additional days of live training classes.

NETWORK. TRAIN. TRANSFORM.

Stay up-to-date and learn from the best! We offer exclusive, comprehensive trainings to stay current and expand your knowledge, update your certifications, or get back to the basics. We have a limited schedule of trainings, classes, and certification courses this year, but have been working to creatively and diligently to make sure our online experience offers the same great learning experience you've come to know from our training course.

Tailored teaching and learning from colleague in the field. NAHMMMA trainings are taught by seasoned professionals that bring a wealth of industry expertise and know-how to each training. This year, we're excited to offer our training classes **live during our virtual event**, in addition to offering pre-recorded and additional live content.

HOW DO I SIGN UP FOR TRAINING?

Ask us a question! NAHMMMA trainers can be contacted prior to a training for more information about the specific training or to answer general questions.

WHAT'S ON THIS YEAR'S SCHEDULE?

Conference trainings and descriptions on following pages.

“WHAT PEOPLE ARE SAYING ABOUT TRAINING WITH NAHMMMA:

“The trainings, lectures and events were great. This was my first time and I learned a lot from other jurisdictions/states and was able to network. Great experience!”

—2018 Conference Attendee

“The Haz Waste 101 was an excellent overview of the regulatory oversight of managing HHW. School Cleanouts is not something I'm prepared to do yet in my municipality, but I feel much better prepared for when I'm able to tackle it.”

—2019 Conference Attendee

2020 TRAININGS

COURSE CATALOG

HHW 101 (4 HRS)

Monday, September 21 from 9:00—11:00 AM PT *break* 12:00—2:00 PM

Taught by NAHMMA Trainers, David Nightingale, CHMM, Bob Fletcher, CHMM, and Jose Rodriguez, REHS. The training will have something for everyone from the seasoned HHW manager to the newest staffer. This training will provide interested professionals with an overview of household hazardous waste policy and regulation as well as managing options and challenges ranging from small mobile collection program processes to operating year-round permanent fixed facilities.

ADVANCED HAZARDS AKA THINGS THAT GO BOOM! (4 HRS)

Monday, September 21 from 9:00—11:00 AM PT *break* 12:00—2:00 PM

Household chemists have a proclivity for making the life of an HHW collection program staffer “interesting.” It’s a common experience for HHW staff to have a family member of a pharmacist, doctor, chemist, professor, hobbyist, and others bring in boxes of old chemicals and weird wastes, some of which may be explosive or otherwise dangerous. This workshop will provide a lively overview of some of the situations inspectors and HHW personnel have come across and offer tips for defusing these potentially explosive situations with minimal problems of both a human and chemical nature.

CHEMISTRY FOR NON-CHEMIST (4 HRS)

Monday, September 21 from 9:00—11:00 AM PT *break* 12:00—2:00 PM

Build on your knowledge of what the hazards are for HHW products that enter your HHW program. Learn how to use practical references such as labels, SDSs, DOT charts, online databases and reference books to identify the chemical ingredients and properties in HHW products. This course provides information on basic chemistry related to HHW including the basic properties of chemicals, incompatibles, and classification of chemicals collected at HHW programs. Suggested attendees include hazardous waste managers and technicians, environmental health & safety inspectors and fire inspectors.

8-HR HAZWOPER REFRESHER (8 HRS)

Thursday & Friday, September 24-25 from 9:00—11:00 AM PT *break* 12:00—2:00 PM

Every year after the initial 24 or 40 hour HAZWOPER training requirement has been met, workers are required to take an 8-hour HAZWOPER refresher course. This refresher course is designed to meet the annual training requirement for the household hazardous waste operations.

DOT HAZMAT (6 HRS)

Thursday & Friday, September 24-25 from 9:00—11:00 AM PT *break* 12:00—1:00 PM

Dept. of Transportation (DOT) training is required every 3 years for anyone that has responsibilities with shipping hazardous materials. This course includes packing, labeling, and marking drums; buying labels; manifest signing and completion. This course will be presented to serve as either initial training or refresher. Come prepared to ask those tough questions about the Title 49 CFR.
